Agreement on the supply of plant material

Since the Convention of Biological Diversity (CBD, Rio de Janeiro, 1992) came into force, botanical gardens must comply with the convention's agreement, particularly those, which deal with the exchange of plant material (Article 15, Access to Genetic Resources). The garden is dedicated to the conservation, sustainable use and research of biological diversity. With regard to acquisition, maintenance, supply, and transfer of plant material, the garden expects that its partners act in a manner that is consistent to the letter and the spirit of the CBD, the Convention on International Trade of Endangered Species(CITES) and in compliance with all relevant conventions and laws relating to the protection of biological diversity. Consequently, only those persons and institutions that accept the following conditions will receive plant material from the garden's collection;

1. On the basis of this agreement the material is intended to serve the common good, particularly scientific study, education and the interests of environmental protection.
2. Upon accepting plant material from the garden, the recipient is obliged to document and preserve information relating to the plant material appropriately.
3. In the event that scientific publications about the plant material provided are published, the origin of the material is to be cited. In addition, these publications are expected to be sent to the garden automatically, without request.
4. Intended commercial use by the recipient is not covered by this agreement. This commercialization is the subject of a separate agreement with the country of origin. This agreement underlies the provision of the CBD, i.e. the user is obliged to share benefits with the country of origin and to forward relevant information to the authority instructed with the implementation of the CBD.
5. The garden will forward information regarding the origin of the supplied material when requested to the authority instructed, in accordance with the CBD'.
6. Plant material may only be supplied on the basis and under the conditions of this or corresponding agreements.

I accept the above conditions.
